

Pleasure Ride CMS

The Pleasure Ride CMS solution uses a content management system.

A content management system is software that is implemented on your website allowing you to manage the site from the web browser.

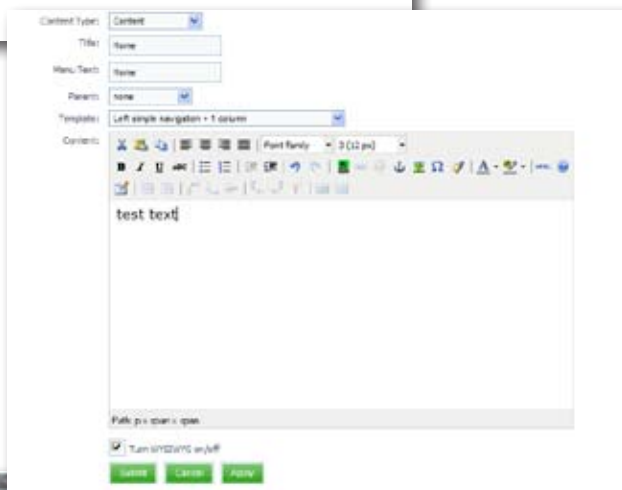

It is useful for users that do not know how to edit a normal website, as it allows simple file uploading and content management.

There is an administration area where you will login and have access to the pages of the website to edit.

Each page can then be edited via a text editor known as a WYSIWYG text editor, where you can change fonts, upload images, create tables and more!

“Pleasure Ride CMS system is such a breeze to use.”

After seeing a number of top quality websites designed by Show Pony Graphics, I decided that it was about time to take the plunge and get one created for our stud. I was so surprised at the extremely reasonable price and the Pleasure Ride CMS system is such a breeze to use.

I was thrilled with the service and will continue to use Show Pony Graphics for all my future website and advertising needs.
